EXIST instalación

Antes de instalarlo debe estar instalado el jdk de java

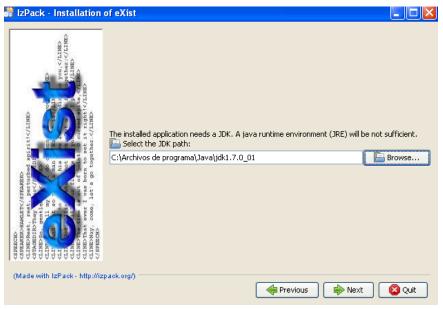

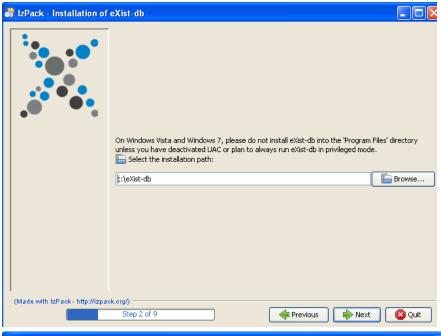

Descargamos eXists de

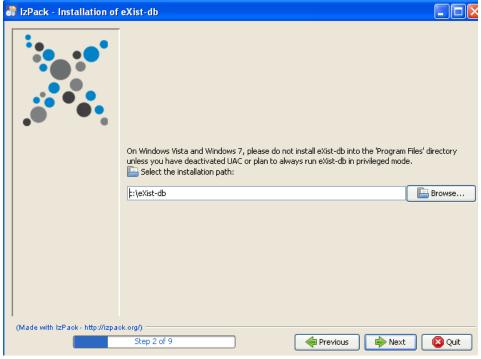

http://exist-db.org/download.xml

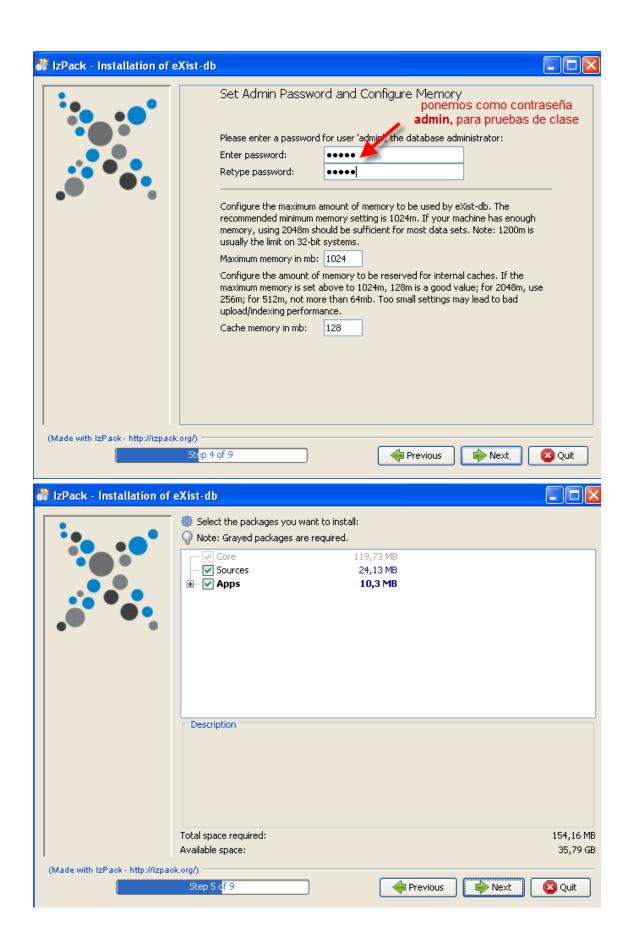

http://exist-db.org/exist/apps/homepage/index.html

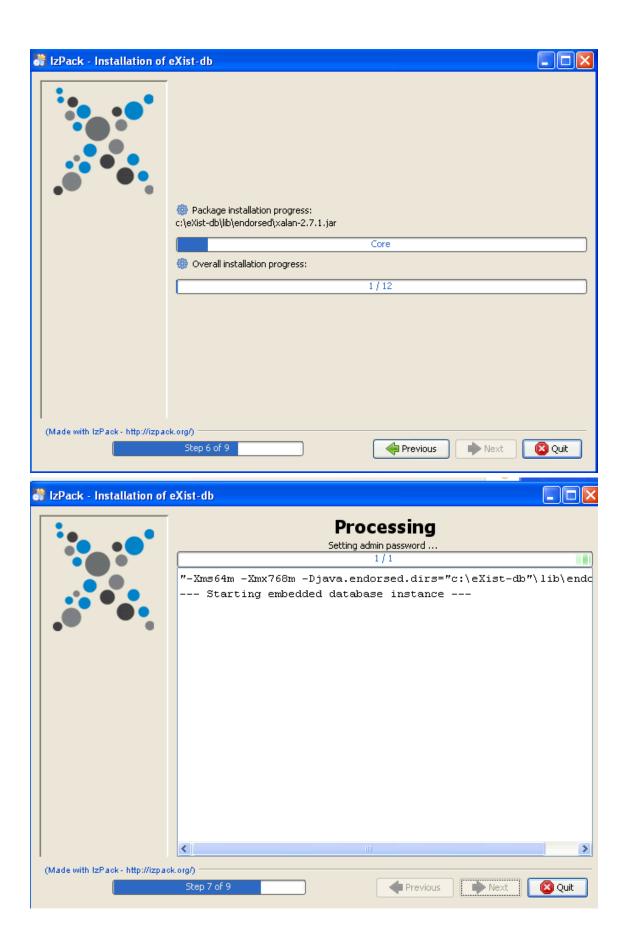

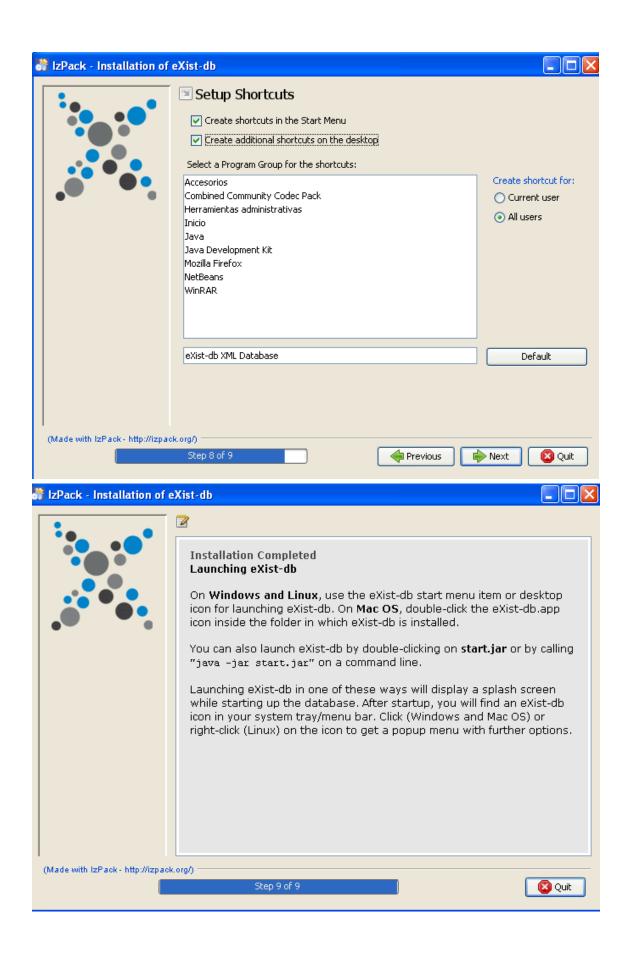

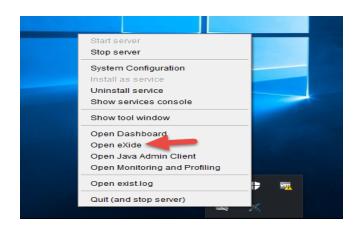

USO DE EXIST

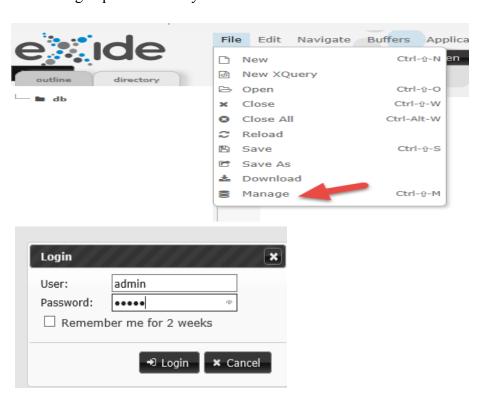

Arrancamos el servicio de base de datos

Selecciono en el menú contextual ítem open Dashboard/ Open exide

File/Manage pedirá uuario y Pw

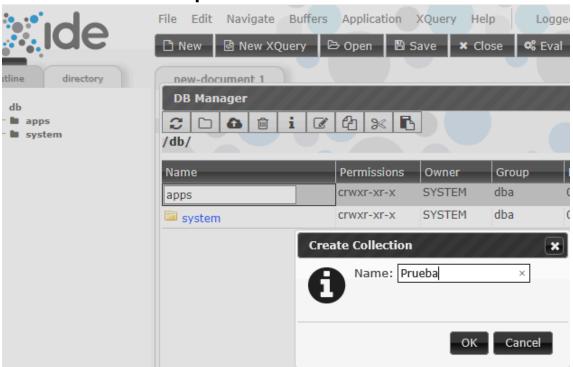

PASOS PARA COMENZAR A TRABAJAR

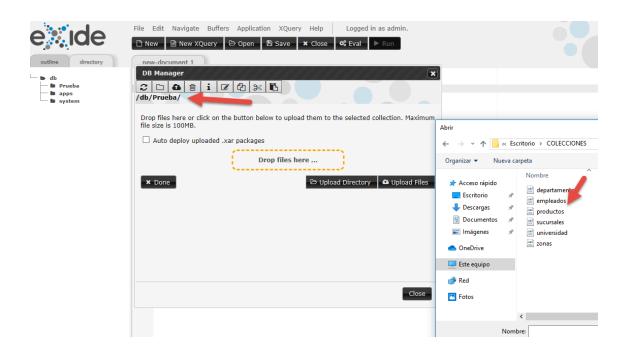

- 1. Primero hay que crear una colección
- 2. Seleccionar esta colección llamada ejemplo
- 3. subir el fichero xml a la base de datos

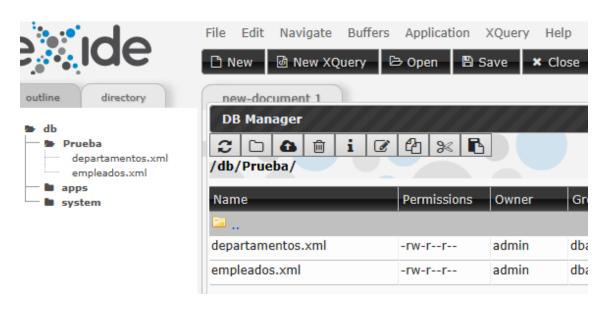

Me conecto como admin/admin

1. Creamos la colección prueba

Subimos dos ficheros XML a la colección pruebas

Usamos Exide para hacer las consultas
